Erosion control woven geotextile

CocoRoller + 900

Material	100% Coir
Warp & Weft	80:60/m
Mesh spacing	6-8mm
Weight	900g/m2

Standard roll dimensions

Width	2 m
Length	50 m
Area	100 m2
Diameter	44-46cm
Weight/roll	85-90 kg

Loading capacity in 40'HC container

200rolls = 20,000m2

Why Is Erosion Control Important? Without erosion control, your topsoil may lose its ability to hold nutrients, regulate water flow, and combat pollutants. In addition to affecting the ecosystem of nearby wildlife, residential properties and transportation systems can suffer long term damage.
